DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 15 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 further defines “calculating” step of claim 13 by referring back to the step by reciting “said calculating.” However, claim 13 recites two instances of “calculating said threshold.” Thus, the reading of claim 15 alone fails to particularly point out which of the two “calculating” steps (or both) is referred back to. However, in light of the specification and the context of the claims, “said calculating” in claim 15 is interpreted as referring back to both instances of “calculating said threshold.” A confirmation or appropriate correction is required.

Claim 16 is rejected for the same reason because of its dependence on claim 15.

Allowable Subject Matter

3. Claims 1-14, 17-31 are allowed.
4. Claims 15 and 16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter: No prior art has been found to disclose a threshold calculating apparatus/method having “a first

bandwidth” and “a second bandwidth” (where “bandwidth” is the speed at which a threshold calculation technique adjusts to a baseband signal offset), which are respectively selected if the absolute value of a difference between an input signal and the threshold is greater than a first value and if the absolute value is less than the first value.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Jackson et al (US 6,163,580), Huang (US 6,115,429) and Hutchins et al. (US 5,508,855) each disclose an adaptive threshold determining unit.
